

## **Institution Industry Cell (IIC)**

The Institution Industry Cell (IIC), also referred to as the Industry Institute Partnership Cell (IIPC), is a strategic initiative mandated by bodies like AICTE, UGC, and NAAC in affiliated colleges to bridge the gap between academic institutions and industry. Its primary objective is to facilitate mutual cooperation between the two sectors to ensure the employability, skill development, and real-world preparedness of students. For colleges like Tetso College, the IIC aligns with the broader national goals of enhancing industry collaboration, innovation, and entrepreneurship in higher education.

### **Roles and Responsibilities:**

- Promote interaction between faculty and industry through joint research, consultancy, and industrial visits.
- Facilitate student internships, live projects, and industrial training to improve practical knowledge and job-readiness.
- Organize guest lectures, workshops, and seminars by industry professionals to supplement academic learning.
- Establish Memoranda of Understanding (MoUs) with industries to ensure long-term partnerships and structured engagement.
- Identify current industry trends and skill requirements to inform curriculum enrichment.
- Provide career guidance and placement support by networking with industry partners.
- Encourage entrepreneurship and innovation by connecting students with startup mentors and incubators.
- Invite industries for campus recruitment and project evaluations.

  
Principal

- Facilitate industrial research projects and consultancy work for faculty and students.
- Promote collaborative development of syllabi with industry experts for vocational and applied learning.

### **Benefits to Stakeholders:**

#### a) For Tetso College:

- Enhances academic relevance by integrating real-world skills and industry-aligned learning.
- Improves NAAC and UGC accreditation metrics through active industry collaboration and placement records.
- Boosts student placement and internship opportunities, strengthening the college's reputation and appeal to prospective students.
- Provides avenues for faculty development, applied research, and funding through industry-sponsored projects.

#### b) For Industries:

- Gains access to a skilled and trained talent pool familiar with current industry practices.
- Can collaborate with the college on customised training, research, and development solutions.
- Strengthens corporate social responsibility (CSR) by supporting regional education and innovation ecosystems.
- Enables identification of potential recruits at an early stage, reducing recruitment costs and effort.

The Institution Industry Cell is, therefore, a vital platform for synergy between academia and industry, ensuring that students graduate with the competencies
